

In the Claims

We claim :

1. A process for carrying out an international transaction over EMF

communication links using computer to computer communications comprising the

steps of :

(a) selecting a language in which to view catalogue information on products;

(b) selecting a currency in which to obtain a price of the products;

(c) selecting products to be purchased and a destination for said selected products to be purchased thereby triggering a calculation of all costs involved in moving said selected products to said destination based upon said destination and said selected products; and,

(d) ordering said selected products thereby triggering an electronic funds transfer authorization and generation of electronic title for said selected products.
